

VORONOI · NESTED AUTONOMY OVER A DURABLE EVIDENCE SUBSTRATE

Three loops of decreasing lifetime and disjoint authority, coupled only through files, released only by a progressive standard of proof.

■ L0 control · deterministic code ■ L1 reasoning · episodic LLM ■ L2 execution · one-shot LLM ■ evidence substrate · durable files ■ science gates · rigor enforcement ■ human decision point

Authority is strictly partitioned: the control loop never reasons, the reasoning loop never executes, and workers never coordinate. Every hand-off is a durable write.
